24 My 39 X B

Vol. 8-11
1933-37

INDEX

TO GENERAL RADIO EXPERIMENTER

Volumes VIII and IX, June, 1933, through May, 1935

INDEX BY TITLE

Acoustic Response Recorder, New (June, 1934)

Adjustable Auto-Transformer, Well Designed (July-August, 1934)

Adjustable Transformer—The Variac, A New (H. H. Scott: June-July, 1933)

Alternating-Current Bridges, Amplifiers for (J. D. Crawford: July-August, 1934)

Amplifiers for Alternating-Current Bridges (J. D. Crawford: July-August, 1934)

An Improved Audio Oscillator (H. W. Lamson: May, 1935)

Analysis of Complex Sounds of Constant Pitch, The (H. H. Scott: May, 1935)

Analysis, Power Factor Measurements in Oil (R. F. Field: September-October, 1934)

Analysis, Wave (L. B. Arguimbau: June-July, 1933)

Antenna Measuring Set (W. B. Lodge, Columbia Broadcasting System: June, 1934)

Antennas and Other Impedances, Improvements in Radio-Frequency Bridge Methods for Measuring (C. E. Worthen: December, 1933)

As the Wave Analyzer Views the Tuning-Fork Oscillator (January-February, 1934)

Audio Oscillator, An Improved (H. W. Lamson: May, 1935)

Audio Voltages, A Method of Securing Small (J. W. Horton: June-July, 1933)

Auto-Transformer, Well-Designed Adjustable (July-August, 1934)

Bridge-Circuit Use, A Shielded Transformer for (R. F. Field: April, 1934)

Bridge for Testing of Electrolytic Condensers, A (R. F. Field: June-July, 1933)

Bridge Methods for Measuring Antennas and Other Impedances, Improvements in Radio-Frequency (C. E. Worthen: December, 1933)

Bridge, TYPE 516-C Radio-Frequency (December, 1933)

Bridge + Vacuum Tube = Megohm Meter (R. F. Field: June-July, 1933)

Bridges, Amplifiers for Alternating-Current (J. D. Crawford: July-August, 1934)

Broadcast Frequency Monitors for Complete A-C Operation, Modification of (H. H. Dawes: March, 1935)

Broadcast Transmission, Improving Quality in (H. H. Scott: August-September, 1933)

Broadcasting Stations, Monitoring of (L. B. Arguimbau: January, 1935)

Broadcasting Stations, Monitoring of—Part II (L. B. Arguimbau: February, 1935)

Camera, A New Moving-Film (H. W. Lamson: November-December, 1934)

Camera Records High-Speed Transients, The New (November-December, 1934)

Camera, Taking Slow-Motion Movies with an Ordinary Motion-Picture (J. D. Crawford: March, 1934)

Capacitance and Its Measurement, Direct (R. F. Field: November, 1933)

Capacitance Oil Cell, A Large (R. F. Field: April, 1935)

Cathode-Ray Oscillograph, Photography of Transients with a (J. D. Crawford: May, 1934)

Cathode-Ray Oscillographs, A Comparison Between (November-December, 1934)

Cathode-Ray Oscillographs and Their Applications (A. E. Thiessen: November, 1933)

Cathode-Ray Oscillographs, Some Improvements in (J. D. Crawford: June-July, 1933)

Cell, A Large Capacitance Oil (R. F. Field: April, 1935)

Chart, A New Reactance (March, 1935)

Chart, A New Reactance (April, 1935)

Chemistry, Chronograph Measurements in (H. W. Lamson: August-September, 1933)

Chronograph Measurements in Chemistry (H. W. Lamson: August-September, 1933)

Comparison Between Cathode-Ray Oscillographs, A (November-December, 1934)

Complex Sounds of Constant Pitch, The Analysis of (H. H. Scott: May, 1935)

Computing Reactance-Resonance Problems, Help in (June, 1934)

Condensers, A Bridge for Testing of Electrolytic (R. F. Field: June-July, 1933)

Condensers for the Laboratory, Mica (April, 1935)

Condensers, New Specifications for TYPE 505 (August-September, 1933)

Constant-Inductance Resistors (R. F. Field: March, 1934)

"Coverage Service a Specialty" (June, 1934)

Crosley's WLW (May, 1934)

Developments in Electron Oscillography, New (June, 1934)

Developments in Frequency Standards, Recent (C. E. Worthen: January-February, 1934)

Dials Are Made, How (M. T. Smith: May, 1934)

Dials, New (February, 1935)

Dials, New Knobs and (August-September, 1933)

Direct-Reading Variable Inductors (January, 1935)

Edgerton Stroboscope, A Larger (August-September, 1933)

Electrolytic Condensers, A Bridge for Testing of (R. F. Field: June-July, 1933)

Electron Oscillograph, A New Sweep Circuit for the (H. H. Scott: May, 1934)

Electron Oscillography, New Developments in (June, 1934)

Experimental-Equipment Construction, Simplifying (October, 1933)

Fast-Screen Tubes Now Standard Equipment on GR Oscillographs—Price Changes (November-December, 1934)

Fast-Screen versus Slow-Screen Tubes (November-December, 1934)

Filter Characteristics, Waveform Errors in the Measurement of (A. E. Thiessen: March, 1935)

Frequency Monitor for Police and Higher Frequencies, A (C. E. Worthen: April, 1935)

Frequency Monitors for Complete A-C Operation, Modification of Broadcast (H. H. Dawes: March, 1935)

Frequency Standards, Recent Developments in (C. E. Worthen: January-February, 1934)

General Radio-Hazeltine Reactance Meter, The (H. H. Scott: April, 1934)

General Radio Instruments, Uses for (March, 1935)

Help in Computing Reactance-Resonance Problems (June, 1934)

High-Speed Transients, The New Camera Records (November-December, 1934)

How Dials Are Made (M. T. Smith: May, 1934)

Impedance Matching (A. E. Thiessen: July-August, 1934)

Impedances, Improvements in Radio-Frequency Bridge Methods for Measuring Antennas and Other (C. E. Worthen: December, 1933)

Improved Audio Oscillator, An (H. W. Lamson: May, 1935)

Improvements in Cathode-Ray Oscillographs, Some (J. D. Crawford: June-July, 1933)

Improvements in Radio-Frequency Bridge Methods for Measuring Antennas and Other Impedances (C. E. Worthen: December, 1933)

Improving Quality in Broadcast Transmission (H. H. Scott: August-September, 1933)

Inductance, The Measurement of a Small (R. F. Field: March, 1934)

Inductors, Direct-Reading Variable (January, 1935)

Inductors for the Power Oscillator, New (March, 1934)

Inductors, Plug-In (October, 1933)

Instruments, Uses for General Radio (March, 1935)

Knobs and Dials, New (August-September, 1933)

Large Capacitance Oil Cell, A (R. F. Field: April, 1935)

Larger Edgerton Stroboscope, A (August-September, 1933)

Little Eva Goes to Heaven on a Variac: Theater Notes (J. D. Crawford: December, 1933)

Matching, Impedance (A. E. Thiessen: July-August, 1934)

Measurement of a Small Inductance, The (R. F. Field: March, 1934)

Measurement of Filter Characteristics, Wave form Errors in the (A. E. Thiessen: March, 1935)

Measurements in Chemistry, Chronograph (H. W. Lamson: August-September, 1933)

Measurements in Oil Analysis, Power Factor (R. F. Field: September-October, 1934)

Measuring Antennas and Other Impedances, Improvements in Radio-Frequency Bridge Methods for (C. E. Worthen: December, 1933)

Megohm Meter, Bridge + Vacuum Tube = (R. F. Field: June-July, 1933)

Method of Securing Small Audio Voltages, A (J. W. Horton: June-July, 1933)

Mica Condensers for the Laboratory (April, 1935)

Modification of Broadcast Frequency Monitors for Complete A-C Operation (H. H. Dawes: March, 1935)

Monitor for Police and Higher Frequencies, A Frequency (C. E. Worthen: April, 1935)

Monitoring of Broadcasting Stations (L. B. Arguimbau: January, 1935)

Monitoring of Broadcasting Stations — Part II (L. B. Arguimbau: February, 1935)

Monitors for Complete A-C Operation, Modification of Broadcast Frequency (H. H. Dawes: March, 1935)

Motion-Picture Camera, Taking Slow-Motion Movies with an Ordinary (J. D. Crawford: March, 1934)

Moving-Film Camera, A New (H. W. Lamson: November-December, 1934)

New Acoustic Response Recorder (June, 1934)

New Adjustable Transformer—The Variac, A (H. H. Scott: June-July, 1933)

New Camera Records High-Speed Transients, The (November-December, 1934)

New Developments in Electron Oscillography (June, 1934)

New Dials (February, 1935)

New Inductors for the Power Oscillator (March, 1934)

New Knobs and Dials (August-September, 1933)

New Moving-Film Camera, A (H. W. Lamson: November-December, 1934)

New Reactance Chart, A (March, 1935)

New Reactance Chart, A (April, 1935)

New Specifications for TYPE 505 Condensers (August-September, 1933)

New Sweep Circuit for the Electron Oscillograph, A (H. H. Scott: May, 1934)

New Variacs (January-February, 1934)

New York Engineering Office (June, 1934)

Noise Meter with a Vibration Pickup, Using the (H. H. Scott: April, 1935)

Oil Analysis, Power Factor Measurements in (R. F. Field: September-October, 1934)

Oil Cell, A Large Capacitance (R. F. Field: April, 1935)

On Service in Tropical Java (November, 1933)

Oscillator, An Improved Audio (H. W. Lamson: May, 1935)

Oscillograph, A New Sweep Circuit for the Electron (H. H. Scott: May, 1934)

Oscillograph, Photography of Transients with a Cathode-Ray (J. D. Crawford: May, 1934)

Oscillographs, A Comparison Between Cathode-Ray (November-December, 1934)

Oscillographs, Cathode-Ray and Their Applications (A. E. Thiessen: November, 1933)

Oscillographs, Fast-Screen Tubes Now Standard Equipment on GR—Price Changes (November-December, 1934)

Oscillographs, Some Improvements in Cathode-Ray (J. D. Crawford: June-July, 1933)

Oscillography, New Developments in Electron (June, 1934)

Photography of Transients with a Cathode-Ray Oscillograph (J. D. Crawford: May, 1934)

Photography, Variac Applications in (January, 1935)

Plug-In Inductors (October, 1933)

Police and Higher Frequencies, A Frequency Monitor for (C. E. Worthen: April, 1935)

Power Factor Measurements in Oil Analysis (R. F. Field: September-October, 1934)

Power Oscillator, New Inductors for the (March, 1934)

Power Supplies (September-October, 1934)

Price Changes — Fast-Screen Tubes Now Standard Equipment on GR Oscillographs (November-December, 1934)

Quality in Broadcast Transmission, Improving (H. H. Scott: August-September, 1933)

Rack, Universal Relay (October, 1935)

Radio-Frequency Bridge Methods for Measuring Antennas and Other Impedances, Improvements in (C. E. Worthen; December, 1933)

Radio-Frequency Bridge, TYPE 516-C (December, 1933)

Reactance Chart, A New (March, 1935)
Reactance Chart, A New (April, 1935)
Reactance Meter, The General Radio-Hazeltine (H. H. Scott: April, 1934)
Reactance-Resonance Problems, Help in Computing (June, 1934)
Recent Developments in Frequency Standards (C. E. Worthen: January-February, 1934)
Relay Rack, Universal (October, 1933)
Resistance-Coupled Voltage Amplifier, An A-C Operated (L. B. Arguimbau: September, 1933)
Resistors, Constant-Inductance (R. F. Field: March, 1934)
Rollator, The Stroboscope Stops the (Reprint from Norge News: March, 1935)
Service in Tropical Java, On (November, 1933)
Shielded Transformer for Bridge-Circuit Use, A (R. F. Field: April, 1934)
Simplifying Experimental-Equipment Construction (October, 1933)
Slow-Screen Tubes, Fast-Screen versus (November-December, 1934)
Slow-Motion Movies with an Ordinary Motion-Picture Camera, Taking (J. D. Crawford: March, 1934)
Some Improvements in Cathode-Ray Oscillographs (J. D. Crawford: June-July, 1933)
Sounds in Nature, Supersonic (Elbert P. Little, Harvard Alumni Bulletin: February, 1935)
Sounds of Constant Pitch, The Analysis of Complex (H. H. Scott: May, 1935)
Specifications for TYPE 505 Condensers, New (August-September, 1933)
Standards, Recent Developments in Frequency (C. E. Worthen: January-February, 1934)
Stroboscope, A Larger Edgerton (August-September, 1933)
Stroboscope Stops the Rollator, The (Reprint from Norge News: March, 1935)
Supersonic Sounds in Nature (Elbert P. Little, Harvard Alumni Bulletin: February, 1935)
Sweep Circuit for the Electron Oscillograph, A New (H. H. Scott: May, 1934)
Taking Slow-Motion Movies with an Ordinary Motion-Picture Camera (J. D. Crawford: March, 1934)
Theater Notes: Little Eva Goes to Heaven on a Variac (J. D. Crawford: December, 1933)
Transformer, A New Adjustable — The Variac (H. H. Scott: June-July, 1933)
Transformer for Bridge-Circuit Use, A Shielded (R. F. Field: April, 1934)
Transients with a Cathode-Ray Oscillograph, Photography of (J. D. Crawford: May, 1934)
Transients, The New Camera Records High-Speed (November-December, 1934)
Transmission, Improving Quality in Broadcast (H. H. Scott: August-September, 1933)
Tubes, Fast-Screen versus Slow-Screen (November-December, 1934)
Tubes Now Standard Equipment on GR Oscillographs—Price Changes, Fast-Screen (November-December, 1934)
Tuning-Fork Oscillator, As the Wave Analyzer Views the (January-February, 1934)
230-Volt TYPE 200-C Variacs (April, 1935)
Universal Relay Rack (October, 1933)
Uses for General Radio Instruments (March, 1935)
Using the Noise Meter with a Vibration Pickup (H. H. Scott: April, 1935)
Variable Inductors, Direct Reading (January, 1935)
Variac, The — A New Adjustable Transformer (H. H. Scott: June-July, 1933)
Variac Applications in Photography (January, 1935)
Variac for High Power, A (September-October, 1934)
Variac, Little Eva Goes to Heaven on a: Theater Notes (J. D. Crawford: December, 1933)
Variacs, New (January-February, 1934)
Variacs, 230-Volt TYPE 200-C (April, 1935)
Vibration Pickup, Using the Noise Meter with a (H. H. Scott: April, 1935)
Wave Analysis (L. B. Arguimbau: June-July, 1933)
Wave Analyzer Views the Tuning-Fork Oscillator, As the (January-February, 1934)
Waveform Errors in the Measurement of Filter Characteristics (A. E. Thiessen: March, 1935)
Well-Designed Adjustable Auto-Transformer (July-August, 1934)
WLW, Crosley's (May, 1934)

INDEX BY TYPE NUMBER

C-10 Secondary Standard
Recent Developments in Frequency Standards (C. E. Worthen: January-February, 1934)

C-21-H Standard-Frequency Assembly
Recent Developments in Frequency Standards (C. E. Worthen: January-February, 1934)

100 Variac
A Variac for High Power (September-October, 1934)
Variac Applications in Photography (January, 1935)

107 Variable Inductor
Direct-Reading Variable Inductors (January, 1935)

177 Inductor Forms
Plug-In Inductors (October, 1933)

200 Variac
Variac Applications in Photography (January, 1935)
The Variac — A New Adjustable Transformer (H. H. Scott: June-July, 1933)
Theater Notes: Little Eva Goes to Heaven on a Variac (J. D. Crawford: December, 1933)

200-B Variac
New Variacs (January-February, 1934)

200-CM Variac
Well-Designed Adjustable Auto-Transformer (July-August, 1934)

200-CUH Variac
230-Volt TYPE 200-C Variacs (April, 1935)

213-B Audio Oscillator
As the Wave Analyzer Views the Tuning-Fork Oscillator (January-February, 1934)

216 Capacity Bridge
Direct Capacitance and Its Measurement (R. F. Field: November, 1933)
A Shielded Transformer for Bridge-Circuit Use (R. F. Field: April, 1934)

222 Precision Condensers
Amplifiers for Alternating-Current Bridges (J. D. Crawford: July-August, 1934)

421-A R-F Reactance Meter
The General Radio-Hazeltine Reactance Meter (H. H. Scott: April, 1934)

456-A Duplex Siphon Recorder
Chronograph Measurements in Chemistry (H. W. Lamson: August-September, 1933)

457 Modulation Meter
Improving Quality in Broadcast Transmission (H. H. Scott: August-September, 1933)

475-A Frequency Monitor
A Frequency Monitor for Police and Higher Frequencies (C. E. Worthen: April, 1935)

505 Condenser
New Specifications for TYPE 505 Condensers (H. H. Scott: August-September, 1933)

509 Mica Condenser
Mica Condensers for the Laboratory (April, 1935)

510 Decade-Resistance Units
Constant-Inductance Resistors (R. F. Field: March, 1934)

514-AM Amplifier
The Analysis of Complex Sounds of Constant Pitch (H. H. Scott: May, 1935)

516-C Radio-Frequency Bridge
Improvements in Radio-Frequency Bridge Methods for Measuring Antennas and Other Impedances (C. E. Worthen: December, 1933)

519-A Dial Lens
How Dials Are Made (M. T. Smith: May, 1934)

521-A Edgerton Stroboscope
A Larger Edgerton Stroboscope (August-September, 1933)

528 Cathode-Ray Oscillograph Assembly
Some Improvements in Cathode-Ray Oscillographs (J. D. Crawford: June-July, 1933)
Cathode-Ray Oscillographs and Their Applications (A. E. Thiessen: November, 1933)
A Comparison Between Cathode-Ray Oscillographs (November-December, 1934)
Fast-Screen Tubes Now Standard Equipment on GR Oscillographs — Price Changes (November-December, 1934)
Replacement Tubes for Cathode-Ray Oscillographs (November-December, 1934)

528-B Cathode-Ray Tube
Replacement Tubes for Cathode-Ray Oscillographs (November-December, 1934)
Performance Specifications for Cathode-Ray Tubes (November-December, 1934)

Errata — Performance Specifications for Cathode-Ray Tubes (February, 1935)

536-A Distortion-Factor Meter
Improving Quality in Broadcast Transmission (H. H. Scott: August-September, 1933)

541-D Transformer
Impedance-Matching (A. E. Thiessen: July-August, 1934)

544-A Megohm Meter
Bridge + Vacuum Tube = Megohm Meter (R. F. Field: June-July, 1933)

546-A Audio-Frequency Microvolter
A Method of Securing Small Audio Voltages (J. W. Horton: June-July, 1933)

548-A Edgerton Stroboscope
Taking Slow-Motion Movies with an Ordinary Motion-Picture Camera (J. D. Crawford: March, 1934)
Supersonic Sounds in Nature (Elbert P. Little, Harvard Alumni Bulletin: February, 1935)
The Stroboscope Stops the Rollator (March, 1935)

559-A Noise Meter
Using the Noise Meter with a Vibration Pickup (H. H. Scott: April, 1935)

575-E Piezo-Electric Oscillator
Modification of Broadcast Frequency Monitors for Complete A-C Operation (H. H. Dawes: March, 1935)

578-A Bridge Transformer
A Shielded Transformer for Bridge-Circuit Use (R. F. Field: April, 1934)

581-B Frequency-Deviation Meter
Modification of Broadcast Frequency Monitors for Complete A-C Operation (H. H. Dawes: March, 1935)

603-A Standard-Signal Generator
"Coverage Service a Specialty" (June, 1934)

613-B Beat-Frequency Oscillator
New Acoustic Response Recorder (June, 1934)

621-A Edgerton Stroboscope
A Larger Edgerton Stroboscope (August-September, 1933)

632-A Capacitance Bridge
A Bridge for Testing of Electrolytic Condensers (R. F. Field: June-July, 1933)

635-A Electron Oscillograph
Some Improvements in Cathode-Ray Oscillographs (J. D. Crawford: June-July, 1933)
Cathode-Ray Oscillographs and Their Applications (A. E. Thiessen: November, 1933)

635-B Electron Oscillograph
A Comparison Between Cathode-Ray Oscillographs (November-December, 1934)
Fast-Screen Tubes now Standard Equipment on GR Oscillographs — Price Changes (November-December, 1934)
Replacement Tubes for Cathode-Ray Oscillographs (November-December, 1934)

635-P Cathode-Ray Tube
Replacement Tubes for Cathode-Ray Oscillographs (November-December, 1934)
Performance Specifications for Cathode-Ray Tubes (November-December, 1934)

636-A Wave Analyzer
Wave Analysis (L. B. Arguimbau: June-July, 1933)
As the Wave Analyzer Views the Tuning-Fork Oscillator (January-February, 1934)
Waveform Errors in the Measurement of Filter Characteristics (A. E. Thiessen: March, 1935)
Uses for General Radio Instruments (March, 1935)
The Analysis of Complex Sounds of Constant Pitch (H. H. Scott: May, 1935)

637 Knobs
New Knobs and Dials (August-September, 1933)

650-A Impedance Bridge
Direct Capacitance and Its Measurement (R. F. Field: November, 1933)

651-A-E Camera Assembly
A New Moving-Film Camera (Horatio W. Lamson: November-December, 1934)
Fast-Screen Versus Slow-Screen Tubes (November-December, 1934)

655-A Bedell Sweep Circuit
A New Sweep Circuit for the Electron Oscillograph (H. H. Scott: May, 1934)

660-A Universal Rack
Universal Relay Rack (October, 1933)

661 Unit-Panel Equipment
Simplifying Experimental-Equipment Construction (October, 1933)

661-P10 Jack Base
Plug-In Inductors (October, 1933)

667-A Inductance Bridge
The Measurement of a Small Inductance (R. F. Field: March, 1934)

668 Compensated Decade-Resistance Unit
Constant-Inductance Resistors (R. F. Field: March, 1934)

669 Compensated Slide-Wire Resistor
Constant-Inductance Resistors (R. F. Field: March, 1934)

670 Compensated Decade Resistor
The Measurement of a Small Inductance (R. F. Field: March, 1934)
Constant-Inductance Resistors (R. F. Field: March, 1934)

672-A Power Supply
Power Supplies
(September-October, 1934)

673-A Power Supply
Power Supplies (September-October, 1934)

675-L Piezo-Electric Oscillator
Recent Developments in Frequency Standards (C. E. Worthen: January-February, 1934)

679-A Inductor
New Inductors for the Power Oscillator (March, 1934)

679-B Inductor
New Inductors for the Power Oscillator (March, 1934)

683-A Oil Cell
Power Factor Measurements in Oil Analysis (R. F. Field: September-October, 1934)

683-C Oil Cell
A Large Capacitance Oil Cell (R. F. Field: April, 1935)

687-A Electron Oscillograph and Bedell Sweep Circuit
New Developments in Electron Oscillography (June, 1934)
A Comparison Between Cathode-Ray Oscillographs (November-December, 1934)
Fast-Screen Tubes Now Standard Equipment on GR Oscillographs—Price Changes (November-December, 1934)
Replacement Tubes for Cathode-Ray Oscillographs (November-December, 1934)
The Analysis of Complex Sounds of Constant Pitch (H. H. Scott: May, 1935)

687-P Electron Oscillograph Tube
New Developments in Electron Oscillography (June, 1934)
Replacement Tubes for Cathode-Ray Oscillographs (November-December, 1934)
Performance Specifications for Cathode-Ray Tubes (November-December, 1934)

702 Dials
New Knobs and Dials (August-September, 1933)

703 Dials
New Knobs and Dials (August-September, 1933)

704 Precision Dial
How Dials Are Made (M. T. Smith: May, 1934)

705 Friction-Drive Dial
New Dials (February, 1935)

706 Precision Dial
How Dials Are Made (M. T. Smith: May, 1934)

710 Dials
New Knobs and Dials (August-September, 1933)

710-B Dial
How Dials Are Made (M. T. Smith: May, 1934)

712 Plain Dial
New Dials (February, 1935)

713-A Beat-Frequency Oscillator
Waveform Errors in the Measurement of Filter Characteristics (A. E. Thiessen: March, 1935)

714-A Amplifier
The Analysis of Complex Sounds of Constant Pitch (H. H. Scott: May, 1935)

717 Dials
New Knobs and Dials (August-September, 1933)

730-A Transmission-Monitoring Assembly
Monitoring of Broadcasting Stations (L. B. Arguimbau: January, 1935)
Monitoring of Broadcasting Stations — Part II (L. B. Arguimbau: February, 1935)

731-A Modulation Monitor
Monitoring of Broadcasting Stations (L. B. Arguimbau: January, 1935)
Monitoring of Broadcasting Stations — Part II (L. B. Arguimbau: February, 1935)

732-A Distortion and Noise Meter
Monitoring of Broadcasting Stations (L. B. Arguimbau: January, 1935)
Monitoring of Broadcasting Stations — Part II (L. B. Arguimbau: February, 1935)

733-A Oscillator
Monitoring of Broadcasting Stations (L. B. Arguimbau: January, 1935)
Monitoring of Broadcasting Stations — Part II (L. B. Arguimbau: February, 1935)

813-A Oscillator
An Improved Audio Oscillator (H. W. Lamson: May, 1935)

INDEX BY AUTHOR

Amplifiers for Alternating-Current Bridges (July-August, 1934)

Dawes, H. H.
Modification of Broadcast Frequency Monitors for Complete A-C Operation (March, 1935)

Field, R. F.
A Bridge for Testing of Electrolytic Condensers (June-July, 1933)
Bridge + Vacuum Tube = Megohm Meter (June-July, 1933)
Direct Capacitance and Its Measurement (November, 1933)
The Measurement of a Small Inductance (March, 1934)
Constant-Inductance Resistors (March, 1934)
A Shielded Transformer for Bridge-Circuit Use (April, 1934)
Power Factor Measurements in Oil Analysis (September-October, 1934)
A Large Capacitance Oil Cell (April, 1935)

Horton, J. W.
A Method of Securing Small Audio Voltages (June-July, 1933)

Lamson, H. W.
Chronograph Measurements in Chemistry (August-September, 1933)
A New Moving-Film Camera (November-December, 1934)
An Improved Audio Oscillator (May, 1935)

Little, Elbert P.
Supersonic Sounds in Nature (February, 1935)

Scott, H. H.
The Variac — A New Adjustable Transformer (June-July, 1933)
Improving Quality in Broadcast Transmission (August-September, 1933)
The General Radio-Hazeltine Reactance Meter (April, 1934)
A New Sweep Circuit for the Electron Oscillograph (May, 1934)
Using the Noise Meter with a Vibration Pickup (April, 1935)
The Analysis of Complex Sounds of Constant Pitch (May, 1935)

Smith, M. T.
How Dials Are Made (May, 1934)

Thiessen, A. E.
Cathode-Ray Oscillographs and Their Applications (November, 1933)
Impedance Matching (July-August, 1934)
Waveform Errors in the Measurement of Filter Characteristics (March, 1935)

Worthen, C. E.
Improvements in Radio-Frequency Bridge Methods for Measuring Antennas and Other Impedances (December, 1933)
Recent Developments in Frequency Standards (January-February, 1934)
A Frequency Monitor for Police and Higher Frequencies (April, 1935)

PRINTED IN U.S.A.
